REFERENCE

- 1. These specification sheets include materials protected under copyright of Sharp Corporation ("Sharp").

 Please handle with great cares and do not reproduce or cause anyone to reproduce them without Sharp's consent.
- 2. When using this Sharp product, please observe the absolute maximum ratings, other conditions and instructions for use described in the specification sheets, as well as the precautions mentioned below.

Sharp assumes no responsibility for any damages resulting from use of the product which does not comply with absolute maximum ratings, other conditions and instructions for use included in the specification sheets, and the precautions mentioned below.

(Precautions)

- (1) In making catalogue or instruction manual based on the specification sheets, please verify the validity of the catalogue or instruction manuals after assembling Sharp products in customer's products at the responsibility of customer.
- (2) This Sharp product is designed for use in the following application areas;
 - Computers OA equipment Telecommunication equipment (Terminal) Measuring equipment
 - Tooling machines Audio visual equipment Home appliances

If the use of the Sharp product in the above application areas is for equipment listed in paragraphs (3) or (4), please be sure to observe the precautions given in those respective paragraphs.

- (3) Appropriate measures, such as fail-safe design and redundant design considering the safety design of the overall system and equipment, should be taken to ensure reliability and safety when Sharp product is used for equipment in responsibility of customer which demands high reliability and safety in function and precision, such as ;
 - Transportation control and safety equipment (aircraft, train, automobile etc.)
 - Traffic signals Gas leakage sensor breakers Rescue and security equipment
 - · Other safety equipment
- (4) Sharp product is designed for consumer goods and controlled as consumer goods in production and quality.

 Please do not use this product for equipment which require extremely high reliability and safety in function and precision, such as ;
 - Space equipment Telecommunication equipment (for trunk lines)
 - Nuclear power control equipment Medical equipment
- (5) Please contact and consult with a Sharp sales representative if there are any question regarding interpretation of the above four paragraphs.
- 3. Disclaimer

The warranty period for Sharp product is one (1) year after shipment.

During the period, if there are any products problem, Sharp will repair (if applicable), replace or refund.

Except the above, both parties will discuss to cope with the problems.

The failed Sharp product after the above one (1) year period will be coped with by Sharp, provided that both parties shall discuss and determine on sharing responsibility based on the analysis results thereof subject to the above scope of warranty.

The warranty described herein is only for Sharp product itself which are purchased by or delivered to customer. Damages arising from Sharp product malfunction or failure shall be excepted.

Sharp will not be responsible for the Sharp product due to the malfunction or failures thereof which are caused by:

- (1) storage keep trouble during the inventory in the marketing channel.
- (2) intentional act, negligence or wrong/poor handling.
- (3) equipment which Sharp products are connected to or mounted in.
- (4) disassembling, reforming or changing Sharp products.
- (5) installation problem.
- (6) act of God or other disaster (natural disaster, fire, flood, etc.)
- (7) external factors (abnormal voltage, abnormal electromagnetic wave, fire, etc.)
- (8) special environment (factory, coastal areas, hotspring area, etc.)
- (9) phenomenon which cannot be foreseen based on the practical technologies at the time of shipment.
- (10) the factors not included in the product specification sheet.
- 4. Please contact and consult with a Sharp sales representative for any questions about Sharp product.

1. Application

This specification applies to the outline and characteristics of reflective type photointerrupter with connector, Model No. GP2A432LCS0F.

2. Outline

Refer to the attached drawing No. CY15586i02.

3. Ratings and characteristics

Refer to the attached sheet, page 5, 6.

4. Reliability

Refer to the attached sheet, page 7.

5. Outgoing inspection

Refer to the attached sheet, page 8.

6. Supplements

6.1 Reflective object

Black paper (black) : Standard reflective object (SHARP Semiconductor Innovation Co.,Ltd.)

KODAK Gray Cards (use the white side to reflect about 90%)

: Standard reflective object (SHARP Semiconductor Innovation Co.,Ltd.)

PPC paper

: Standard reflective object (SHARP Semiconductor Innovation Co.,Ltd.)

- 6.2 Parts: Refer to the attached sheet, page 9.
- 6.3 Packing drawing: Refer to the attached drawing No. CY15587i09.
- 6.4 ODS materials

This product shall not contain the following materials.

Also, the following materials shall not be used in the production process for this product.

Materials for ODS : CFC_S, Halon, Carbon tetrachloride, 1.1.1-Trichloroethane (Methylchloroform)

6.5 Brominated flame retardants

Specific brominated flame retardants such as the PBBOs and PBBs are not used in this device at all.

- 6.6 Product mass: Approximately 1.5g
- 6.7 Compliance with each regulation
 - 6.7.1 This product complies with EU RoHS Directive (2011/65/EU) and Commission Delegated Directive (EU)2015/863
 - 6.7.2 Content of six substances specified in Management Methods for Control of Pollution Caused by Electronic Information Products Regulation (Chinese: 电子信息产品污染控制管理办法).

Marking Styles for the Names and Contents of the Hazardous Substances

Category	Hazardous Substances								
	Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Hexavalent chromium (Cr ⁶⁺)	Polybrominated biphenyls (PBB)	Polybrominated diphenyl ethers (PBDE)			
Photointerrupter	0	0	0	0	0	0			

This table is prepared in accordance with the provisions of SJ/T 11364.

- O: Indicates that said hazardous substance contained in all of the homogeneous materials for this part is below the limit requirement of GB/T 26572
- Country of origin: China

7. Notes

7.1 The circuit design

Vo terminal: Open drain output.

GP2A432LCS0F operates the light emitter by pulse drive. Please supply the stable supply voltage in order to prevent error operation by pulse current.

At power up, it takes 1 milliseconds that internal circuit becomes stable after reaching operating voltage level.

7.2 Prevention error operation

If the inverter light is directly incident on the light receiving surface, the circuit is designed so that the output is forced to the non-detection state, so it may not work properly.

Please be careful that you need to keep the direct inverter light away from the photo detecting surface since the device. In addition, we recommend to make sure the operation test in the actual application.

7.3 Cleaning

Polycarbonate resin is used as the material of the lens surface. As to cleaning, this reflective type photointerrupter shall not be cleaned by cleaning materials absolutely. Dust and stain shall clean by air blow, or shall clean by soft cloth soaked in washing materials.

7.4 Plugging in/out

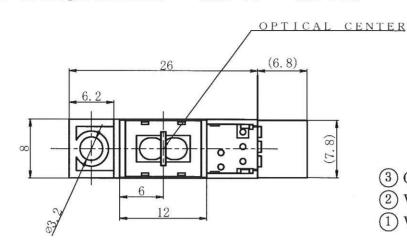

The connector should be plugged in/out at normal temperature.

7.5 Fix of product

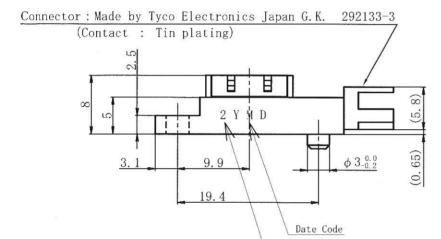

When tightening this product with the screw, please use the M3 machine screw. The recommended tightening torque with M3 machine screw is 0.4 to 0.5 N \cdot m.

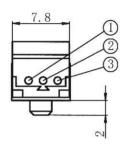

However, this recommended tightening torque is the reference value because the tightening torque varies according to the screw and the bolted joint. Before tightening the screw, please certainly confirm the tightening strength of this product and the object on which this product is mounted Also, when tightening the screw with the tools such as the screw-driver, if the pushing force by the screw-driver is too strong, the damage of the product performances such as the break of the holder's mounting hole may be caused by the application of the external force. Therefore, please be careful not to apply such a force to this product.

3. Ratings and characteristics

3.1 Absolute maximum ratings

Ta=25°C

Parameter	Symbol	Rating	Unit	Remark
Supply voltage	Vcc	-0.5 to +6	V	
Output current	IoL	50	mA	Sink current %1
Operating temperature	Topr	-10 to +85	$^{\circ}$ C	The connector should be plugged in/out
Storage temperature	Tstg	-20 to +85	$^{\circ}$ C	at normal temperature.

^{*1} Fig.1 shows output current vs. ambient temperature.

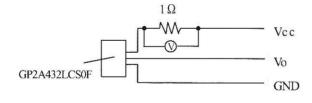

3.2 Electro-optical characteristics

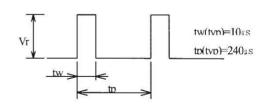

Vcc=3.3 to 5V Ta=-10 to +85°C

Parameter	Symbol	MIN.	TYP.	MAX.	Unit	Conditions
Supply voltage	Vcc	3.0	=	5.5	V	_
Current dissipation (I)	Icc	-		10	mA	Smoothing value, $R_L = \infty$
Current dissipation (II)	Iccp	-	-	250	mA	Pulse peak value *1
Low level output voltage	V _{OL}	-	-	0.4	V	at detection time, I _{OL} =16mA
High level output voltage	V _{OH}	Vcc× 0.9	-	-	V	at non detection time , R_L =1k Ω
Non detection distance	L _{LHL}	-	ī	22.0	mm	KODAK Gray Cards (use the white side to reflect about 90%) *2
	L _{HLL} 9.	=	≅ 0	1.0	1.0 mm	KODAK Gray Cards (use the white side to reflect about 90%) *2
Detection distance		-	-	3.0		Black paper *2
Detection distance		9.0	-	-	mm	KODAK Gray Cards (use the white side to reflect about 90%) *2
		7.0	-10	-	11111	Black paper *2
D	t _{PLH}	=	-	1.0	ms	42
Response time	t _{PHL}	-	-	1.0	ms	*3
Acceptable illuminance	Ev1	5000	_	_	lx	44
of external disturbing light	Ev2	5000	550	-	lx	*4

*1 Pulse peak value | Iccp test method

 $\label{eq:vrwave} \mbox{Vr wave form} \qquad \mbox{Iccp=Vr} \, / \, 1 \, \Omega$

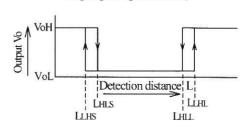

*2 Distance characteristics test method

GP2A432LCS0F Reflective object

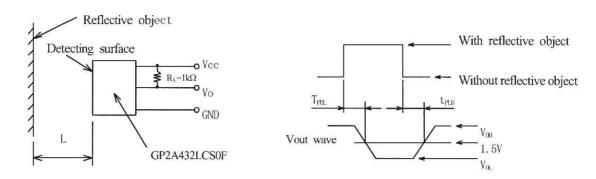

Detecting surface

Output(pull-up resistance)

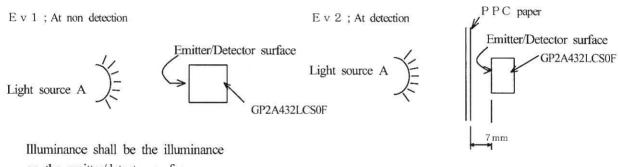

*3 Response time test method

*4 Test measurement method for acceptable illuminate of external disturbing light

Illuminance shall be the illuminance on the emitter/detector surface.

Output should not change "H" to "L".

Illuminance shall be the illuminance on the emitter/detector surface.

Output should not change "L" to "H".

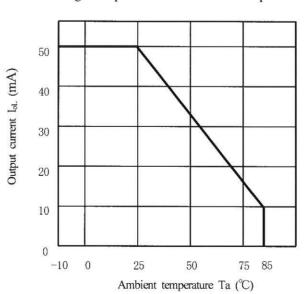

Fig.1 Output current vs. ambient temperature

4. Reliability

The reliability of products shall satisfy items listed below

Confidence level: 90%

LTPD: 10 or 20

		LIPD: 10 C	1 20
Test item	Test conditions	Failure Judgement Criteria	Samples (n) Defective(C)
Temperature cycling	1 cycle -20°C to +85°C (30min) (30min) 20 cycles test		n=22, C=0
High temp. and high humidity storage	+40°C, 95%R.H.* 240h		n=22, C=0
High temp. storage	+85°C, 240h		n=22, C=0
Low temp. storage	-20°C, 240h		n=22, C=0
Operation life	Vcc=5V, Ta=25±3°C, 1000h		n=22, C=0
Mechanical shock	1000m/s ² , 3 times/ X, Y, Z direction	$Icc \ge U \times 1.2$ $V_{OL} \ge U \times 1.2$	n=11, C=0
Variable vibration frequency	Overall amplitude; 1.5mm Frequency range 10 to 55 to 10 Hz / 1min 2h / X, Y, Z direction	$V_{OH} \leq L \times 0.8$ $U: Upper specification limit$	n=11, C=0
Connector strength I	Pull connector housing horizontally to connector terminal pin direction by 20N weight for 5s (1 time)	L: Lower specification limit	n=11, C=0
Connector strength II	Push connector housing perpendicular to connector terminal pin direction by 10N weight for 5s (1 time)		n=11, C=0

^{*} R.H.: Relative humidity

5. Outgoing inspection

	Item	Conditions	Instrument	Judge, Criteria	AQL
1	Appearance	No defects that may conflict with product specifications, including crack, split, chip scratch, burr and blur, No bent connector pin and loosened pin	Visual inspection	Any of the specified defects at left is not acceptable	1.0%
2	Electrical Characteristics*	The same as specified in paragraph 3.2	Dedicated tester	Specimen that does not satisfied the requirements specified on the left-hand side is not acceptable.	0.4%

A single sampling plan, normal inspection level II based on ISO 2859 shall be adopted.

*Electro-optical characterist	ics	Test item	
Current consumption	-		Icc
Low level output voltage	_		V_{OL}
High level output voltage	_		V_{OH}
Detection characteristics	-	T	L_{LHI}
			L _{HLS}
			L _{HLL}

6.2 Supplements

Parts: This product uses the below parts.

6.2.1 Light detector (Quantity: 1)

(Using a silicon photodiode as light detecting portion, and a CMOS IC as signal processing circuit.)

Туре	Maximum sensitivity wavelength (nm)	Sensitivity wavelength (nm)	Response time (μs)	
Photodiode	900	700 to 1200	4	

6.2.2 Light emitter (Quantity: 1)

Туре	Material	Maximum light emitting wavelength (nm)	I/O Frequency (MHz)
Infrared light emitting diode (Non-coherent)	GaAs	950	0.3

6.2.3 Material

Case	

Sensor base : Black PPS resin

(UL 94V-0)

Lens : Polycarbonate resin

(UL 94V-2)

Bottom cover: Polycarbonate resin (Black)

(UL 94V-2)

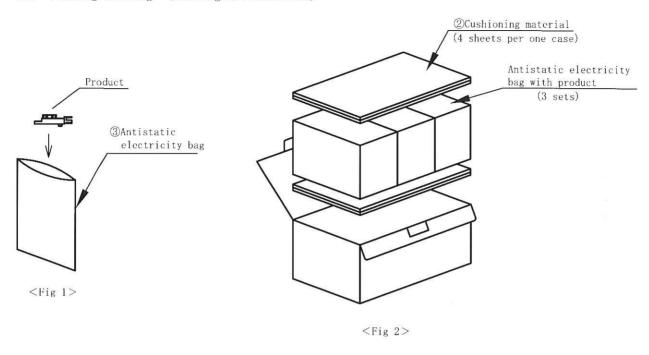

6.2.4 Others

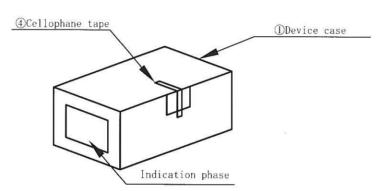

This product shall not be proof against radiation flux.

Laser generator is not used.

6.3 Packing drawing (DrawingNo, CY15587i09)

<Fig 3>
Parts composition table

No.	Name	Material	Quantity
1	Device case	Corrugated cardboard	1/300
2	Cushioning material	Urethane	4/300
3	Antistatic electricity bag	Polyethylene	1/100
4	Cellophane tape		-

Packing method

I. Put	100	devices	into	antistatic	electricity	bag and	seal	with

cellophane tape. (Figl)

2. Put three sets of a thing of above 1 to a device case.

In addition, spread two pieces of cushioning material at top and bottom. (Fig 2)

3. Seal a device case with cellophane tape. (Fig 3)

4. Indication phase (Fig 3)

The contents of the carton indication conforms to EIAJ C-3 and the following items are indicated.

Model No., Internal production control name, Quantity, Packing date,
Corporate name, Country of origin

<Quantity: 300pcs./packing box>

<Mass: Approx.585g/ packing box>

· Storage condition

Packaged products shall be stored at the temperature 5 to $30^{\circ}\!\text{C}$ and the humidity 70%RH or less away from direct sunlight.
